

Shawna Martinez is a Professor Emeritus in Botany from Sierra College where she spent 33 years teaching Forestry, Biology, Botany, and Environmental Science. She spent the earlier part of her career working for the U.S. Forest Service as a rare plant botanist. She has led many ecology-based field trips over the years for Sierra College, both locally and abroad. She also has spent time leading wildflower and naturalist hikes for California Native Plant Society, other non-profits and several local Land Trusts. Currently, she volunteers at U.C. Davis in the Plant Diversity Lab (Herbarium) identifying plants. She earned her B.S. degree from U.C. Davis in Natural Resource Science and completed her M.S. in Conservation Biology and Botany from Sacramento State University which included a thesis on Giant Sequoia ecology. Shawna is an active gardener, hiker, nature enthusiast, and tree-hugger.
